# Next-Gen Crypto Exchange

Global by Design  
Powered by Regional Strength

# Executive Summary

Bitramp is a next-generation global crypto exchange built to eliminate the biggest barriers traders face today. Launching with deep focus on MENA and Pakistan — two of the fastest-growing crypto markets. Bitramp delivers what users truly need:

- ✔ Competitive low trading fees that let you keep more gains.
- ✔ Truly instant local fiat on-ramps and off-ramps in under 5 minutes.
- ✔ Powerful AI trading intelligence for smarter decisions.
- ✔ A premium metal card offering up to 8% cashback for seamless real-world spending.

# BITRAMP

Backed by the BRP Token (fixed 1 billion supply), Bitramp provides strong utility through fee discounts, governance rights, and ecosystem rewards. Bitramp is global by design — open to every country from day one — while using our regional strength in MENA and Pakistan to build unmatched momentum, liquidity, and user loyalty before expanding worldwide.

# The Problem

Entering crypto and using it in everyday life remains frustratingly difficult especially across MENA and Pakistan.

## 01

### Painful On-Ramping

#### Slow & Expensive

Traditional gateways are bogged down by excessive bureaucracy and regional friction.

#### High Fees

Hidden conversion costs and intermediary bank fees eat into your initial investment.

#### Long Transfers

Waiting days for your funds to clear is the norm, causing missed market opportunities.

### Limited Real-World Utility

## 02

#### Few Crypto Cards

Most crypto-native debit cards are unavailable or unsupported in the MENA region.

#### Manual Conversion

Users must manually sell assets for fiat, wait for withdrawal, and then spend.

## 03

### Other Frustrations

#### High Trading Fees

Local exchanges charge massive spreads above the global market rate.

#### Basic Tools

Lack of professional portfolio tracking or advanced order types for retail users.

#### Deposit Delays

Verification loops and bank rejections make funding your wallet a gamble.

### A Localized Crisis

While these problems are global, they are magnified in **Pakistan and across MENA markets** due to fragmented banking systems and shifting regulatory landscapes. We aren't just building for the world; we're solving for home.
